Ms. Susan Harris

I am a concerned resident of Jacumba and I am against the JVR Energy Park project as described in the Draft EIR.

An enormous project that would place 300,000 photovoltaic cells on 643 acres in Jacumba Valley adjacent to our village center on two sides is wrong for our rural community. If this project is built, it will destroy community character and our rural landscape, lower property values, and eliminate available land that would support a revitalized Jacumba. The JVR Park would dwarf our town six times over and negatively impact Jacumba future as a place where people want to live or even visit. It also does not adhere to the Mountain Empire Sub-Regional Plan adopted in 2011. **The County Planning Commission and County Supervisors must reject this project because point-of-use solar remains an environmentally sound option!**
